

GRANT G.
 MORAIN, P.C.

With 14 years experience handling complex personal injury claims, Rising Star Grant G. Morain is an accomplished advocate for individuals and their families. The law firm of Grant G. Morain, P.C., is dedicated solely to the representation of those who have suffered the tragic consequences of serious injuries caused by the negligence of others. "I am proud to be a lawyer on the side of people," Morain says, recognizing that his prior defense experience helps set him apart from other attorneys. "I started as a defense lawyer, so I was able to see how insurance companies work."

PERSONAL ATTENTION Morain selects cases with great care, accepting only a small percentage of those he is asked to review, to ensure that clients receive the personal attention they deserve. Morain

**THE PRACTICE OF
 PERSONAL INJURY
 LAW IS AN
 EXPRESSION OF
 FAMILY VALUES.**

believes that effective presentation of cases is achieved by getting to know his clients and their families. Recognizing that constant communication with his clients is essential, he strives to keep them comfortable and informed during the course of the representation.

THOROUGH PREPARATION Morain maintains his firm's mission — to provide quality, compassionate legal services to injured individuals and families in a timely fashion — through his commitment

to proper and thorough case preparation. Morain remains alert for settlement opportunities, but relishes his time in the courtroom. "I don't prepare cases to settle them," he says. "I prepare them for trial." When an amicable resolution cannot be reached, he aggressively and passionately advocates for his clients in court. "When insurance companies know that you're prepared to try a case, in my experience, they're more willing to pay a fair settlement." Morain spares no effort or expense when preparing a case. His success in one case may be attributed, in large part, to a video settlement package that was culled from 14 hours of videotape statements collected from various witnesses, co-workers, and family.

CUTTING-EDGE SKILLS Morain remains fully abreast of legal developments to maximize recovery for his clients. One client suffered severe and debilitating injuries when he was rear-ended by another driver who was on his company-provided cell phone. Morain utilized a unique legal theory to establish responsibility against both the defendant driver and the defendant driver's employer. Recognizing his abilities, Morain's peers often invite him to speak at law schools and legal seminars, frequently on technology issues.

JUST RESOLUTION Morain does not define success solely in terms of money. Nothing can fully compensate people for their injuries and losses, which often have devastating effects on all aspects of their lives. He believes that compensation should serve to rehabilitate, therefore preserving the victim's quality of life. "My wife and children are the most important things in my life, and if something tragic happened to me, I would be most worried about taking care of them and preserving our relationships," says Morain. "I serve my clients with that goal in mind." Since the family lives of victims of catastrophic accidents often suffer, Morain views the practice of personal injury law as an expression of family values: "Ultimately, I believe that by doing my job the way I should, I am helping people preserve their family lives."
